

# Corro-Protection

## corrosion protection of metal parts for indoor storages

Corro-Protection is a transparent protective film. It lastingly preserves tools and precision components with a dry and waxy layer.

Corro Protection can be used as safe corrosion protection for bare, unpainted metal parts, for the indoor storage of work-pieces, as corrosion protection during overseas transport and for the conservation of tools and precision components.

The protective layer can be removed easily.

### Technical Data

Odour	solvent
Features	on a wax basis
Storage stability	24 months
Colour	milky
Temperature resistance	-20 to +80 °C

### Processing

Clean and degrease surfaces with WEICON Cleaner S. Spray Weicon Corro-Protection (as aerosol) on the parts.

The material is finally cured after approx. 3-4 hours with room temperature. To obtain a higher corrosion protection, several layers can be applied. The protective layer can be removed with WEICON Cleaner S.

### Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.

### Safety and health

When using products, the physical, safety technical, toxicological and ecological data and regulations in our EC safety data sheets must be observed.
